Ethically Sourced Natural Stone

Oakdale and our suppliers are committed to achieving the goals detailed in the ETI Base code outlined below

- Employment is freely chosen
- Freedom of association and the right to collective bargaining are respected
- Working conditions are safe and hygienic
- Child labour shall not be used
- Living Wages are paid
- Working hours are not excessive
- No discrimination is practised
- Regular employment is provided
- No harsh or inhumane treatment is allowed

ArtScaping® offers gardening enthusiasts and professional landscapers an inspired range of ethically sourced natural stone paving and also, in keeping with our Greenscaping ethos, we have utilised ground breaking manufacturing processes to create a unique and beautiful range of sustainable, environmentally friendly concrete paving....Applegarth & Ellerbeck.

Applegarth has a gently undulating surface (reminiscent of worn limestone) and natural subtle hues as random and varied.

Ellerbeck has a riven surface and 'fettled' edges, reminiscent of natural sandstone paving. Our unique manufacturing processes allow us to replicate the random colour variations of natural stone – no two pieces of Ellerbeck are the same!

With 35% of their raw material content coming from recycled, local sources and with an extremely low carbon footprint - Applegarth & Ellerbeck make a viable alternative to natural stone.

Our Porcelain Collection offers manufactured paving which mimics the appearance of natural stone and timber, providing huge aesthetic appeal plus the durability of porcelain stoneware. Precise manufacturing methods mean that porcelain products are easy to lay and create less wastage during installation.

Happy ArtScaping!

Mint Multi

Prestige

Prestige is ethically sourced, natural sandstone paving with a beautiful lightly textured sawn finish.

It is available in 5 subtle hues and looks great in contemporary or traditional settings.

Buff

Applegarth

Applegarth is an environmentally friendly, **manufactured concrete alternative to natural stone**. Its gently undulating surface and subtle, random colour variation (reminiscent of worn limestone).

With 35% of its raw material content coming from recycled, local sources and its extremely low carbon footprint, Applegarth is both sustainable and affordable.

FOOTPRINT
7.49kg CO₂
per m²

Mosssdale Calibrated

Mosssdale is natural sandstone paving with an attractive riven surface.

Its infinite colour variation provides the perfect canvas to create beautiful natural garden landscapes.

Lime Holton

Camel Dust

Ellerbeck

Ellerbeck provides an ideal alternative to natural stone paving, it's much kinder to the environment as it contains recycled materials sourced from local suppliers.

Ellerbeck looks great too! Just like natural stone - the colour variations are both subtle and infinite - no two pieces of Ellerbeck are the same.

Mosssdale Calibrated

The neutral tones of Mosssdale Calibrated combine with any colour schemes, so let your imagination go... and create the garden of your dreams!

Ellerbeck in Barley Blend

Gallery

An eclectic mix of hard landscaping design ideas using natural stone and porcelain products. Remember, most of these beautiful garden features can all be recreated using our environmentally friendly Ellerbeck or Applegarth.

LITEs

The beauty of LITEs is not just held within their appearance. LITEs are thinner and therefore lighter than their counterparts. This makes LITEs easier to handle and easier to lay.

So, for paving that won't break your back, nor your bank account... LITEs are the natural choice!

THE PORCELAIN COLLECTION

Colours & Sizes

We use unique manufacturing processes to create the totally random colour variations found in natural stone. Ellerbeck mimics slabs of weathered Millstone Grit - a coarse Carboniferous Sandstone. Applegarth has a much smoother surface reminiscent of age-worn Limestone paving.
